SERVICE

LIFE OF THE MIND

We nourish and recognize intellectual achievement across a range of academic, creative and professional spheres, both traditional and forward-looking.

COMMUNITY

We believe in collaboration with each other and the larger community; in developing strong partnerships that will support the pursuits of our students, faculty and staff.

EQUITY

Our principles of fairness and inclusion guide our educational mission by fostering an environment of respect, diversity, and dignity for all students, faculty and staff.

RESILIENCE

Our strength is in our ability to recover and adapt quickly to the ever changing socio-cultural, environmental, and economic factors while anticipating what lies ahead.

COURAGE

Our willingness to be different and unique helps us to establish ourselves as a university with a distinct mission and character, rather than a follower in the pattern of others.

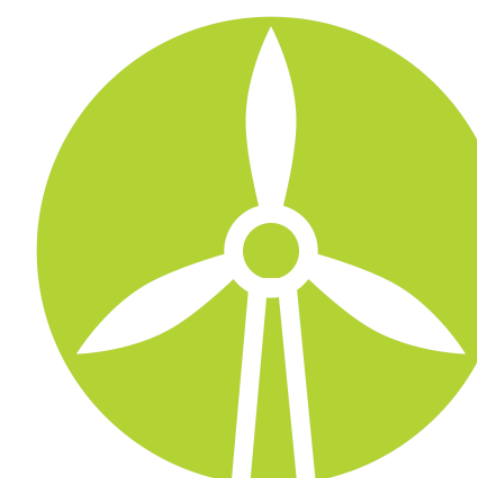

HEALTH & WELLBEING

We recognize the connections between physical health and brain productivity, and strive to create and implement wellness initiatives that positively impact our students, employees, and community.

SUSTAINABLE COMMUNITY

To create conditions that will secure a more sustainable future we will utilize the environmental, economic, social implications, and political capital needed in order to keep students involved.

SERVICE

By enhancing service opportunities and service learning into our programming we can begin to communicate the value of service to our students and our community.

EQUITY, DIVERSITY, & INCLUSION

As managers of programs and services, we must be aware of our diverse student and employee population as well as the environmental factors that could influence their overall wellbeing.

LEADERSHIP

We value leaders with the competence to rise to meet any challenge and respond effectively to the constantly changing demographics of the campus community and environment.

GLOBAL PERSPECTIVE

As recreation professionals we are dedicated to better understanding the economic, social and political forces that shape and impact the lives of people throughout the world.
